Project Management & Collaboration: Agile, Scrum, SAFe, Kanban, Jira, Linear, Notion.

WORK HISTORY

STAFF SOFTWARE ENGINEER | CARSOME
Selangor, Malaysia. Oct 2025 – Sep 2026

- Led the migration from the legacy codebase to the new platform, setting technical direction for new features, performance, and reliability.
- Mentored engineers and owned code quality standards through code reviews.
- Served as rotating Scrum Master for a team of 12: ran stand-ups and retrospectives and removed blockers.
- Aligned frontend, QA, and product teams on delivery against business requirements.

SENIOR SOFTWARE ENGINEER | TIMELOG
Copenhagen, Denmark (Remote). Jan 2024 – Jul 2025

- Supervised the team's 2 interns, guiding their technical growth.
- Owned API integration for the mobile and React web apps as the team's integration engineer.
- Optimized complex queries and stored procedures, cutting execution time by 70%.
- Resolved production issues and support tickets for customers and internal teams.
- Wrote user manuals, technical docs, and READMEs for developers and the Customer Success Department.

SENIOR SOFTWARE ENGINEER | MONSTER WORLDWIDE
Massachusetts, US (Remote). Feb 2022 – Jan 2024

- Interviewed candidates for new team positions and ran onboarding for new joiners, with documentation the whole team could reuse.
- Built an internal Jenkins automation tool that cut CI/CD waiting time and manual effort by 40%.
- Raised code standards across multiple projects through code reviews, refactoring, and unit tests.

SENIOR SOFTWARE ENGINEER | BOOSTORDER
Penang, Malaysia. Sep 2020 – Dec 2021

- Principal engineer on the migration of the legacy B.O. Inventory mobile app to a modern stack, from requirements alignment through technical documentation.
- Replaced Zapier with a direct Azure DevOps API integration, cutting costs by 50%.

- Started API integration testing with Postman on my own initiative and added the new unit tests to the CI/CD pipeline.

ACTING TEAM LEAD | MENUMIZ
Kuala Lumpur, Malaysia. Apr 2019 – Aug 2020

- Led the development team of 5 engineers and moved them from waterfall to Agile.
- Grew the team by 20% by hiring through technical interviews.
- Led the migration of the legacy codebase and database to new platforms.
- Represented engineering with Sales, turning client feedback into a prioritized backlog, and with UI/UX on the app redesign.

SENIOR WEB DEVELOPER | MENUMIZ
Kuala Lumpur, Malaysia. Jan 2018 – Mar 2019

- Worked in a team to translate the requirements into released features.
- Designed the database scheme to ensure seamless relations with keeping in mind producing efficient queries.
- Performed smoke, regression, security, and user acceptance testing to verify successful releases.

WEB DEVELOPER | ROBOTAT
Kuala Lumpur, Malaysia. Jun 2016 – Dec 2017

- Delivered features such as multi-currency and globalization with the backend team.
- Designed and built a relational database to replace Excel-based data management.

SIDE PROJECTS

SOLUTIONS ARCHITECT & FULL-STACK DEVELOPER | ASSAHABA SCHULE
https://www.assahabaschule.com

Owned the full product lifecycle, translating client requirements into working tasks on an agile project board, architecting the system, designing relational databases, engineering backend layers, and building responsive user interfaces.

STAFF FULL-STACK DEVELOPER | TOUCHLESS
Touchless.com.my

Collaborated directly with the CEO to identify and resolve known issues on the product, fixing bugs and optimizing the system performance to improve user experience.

EDUCATION

Damascus University, Syria
Bachelor's degree in Electronic and Telecommunication Engineering. May 2016.
